

Las infecciones nosocomiales son las infecciones contraídas en un hospital u otro establecimiento sanitario diferente al motivo de ingreso. Los factores que condicionan la aparición son:

The diagram illustrates three factors that lead to Diabetes Mellitus, represented by yellow diamond shapes pointing towards a central blue circle labeled "Diabetes Mellitus". The factors are:

- >60**: Represented by a blue icon of an elderly person using a walker.
- Diabetes Mellitus**: Represented by a blue circular arrow icon.
- Immunosuppression**: Represented by an image of medical supplies including a bottle of "AMINO SUPPLEMENTS", a box of "AMMO SUPPLEMENTS", and a syringe.
